

## EDUG WG 930 Archaeology

### Proposals for geographic expansions in 931-939 and Table 2—3

In this document possible geographic expansions in 931-939 and Table 2—3 are listed with literary warrant from WorldCat included. The areas are put in DDC order.

Questions:

1. Are there more European areas that would need a number in 931-939 and Table 2—3?
2. Is the division between the different areas of Europe accurate, i.e. the division between 936.3 and 936.4, or are there areas that should be moved to another DDC number?
3. The proposals in this document are based on the new names of the areas.  
Are there ancient names that should be added as index entries?  
Are there areas where the ancient names should be preferred?
4. For a few of the possible expansions listed below, there is not enough literary warrant in WorldCat.  
Are these expansions necessary?  
If these expansions are going to be included in the proposal, proof of literary warrant from other databases should be added.
