

Dear colleagues,

in this paper I have tried to enrich 930.11-16. The chosen terms appear not only locally, but comprehensive. The vocabulary is taken from LoC-subject headings. The figures in parentheses are the number of titles found in Worldcat with this special subject (non-fiction for not juveniles).

930.11 Eolithikum = Eolithic age

WorldCat results for: (dd: 930.11* : Records found: 16

The literary warrant is very small. In German science Eolithikum is a term which became obsolete. Maybe this is a general direction. Perhaps it might be better to replace Eolithic age by Stone age. More than 4,000 titles have this term as a subject heading and it is never a good decision putting the whole of an epoch in one of its parts.
